

Google Talk

Google Talk provides a simple way to connect instantly with your contacts with instant messaging and free PC-to-PC voice calls anywhere in the world. You can even exchange files with your contacts using Google Talk, with no file size restrictions.

Web-based Start Page

Chat with Gmail

Quick Facts

Web-based chat from the Start Page

Chat with colleagues and friends from right within your Google Apps Start Page. The Google Talk gadget also allows for multi-person chat, so you can communicate more efficiently.

PC-to-PC voice calls (VOIP)

You can talk to anyone else who's online and has the Google Talk client. The person on the other end can be anywhere in the world, and you can talk for as long as you want. If your contacts aren't online when you want to chat, you can leave a voicemail.

Real-time file transfers and text messaging

Send files and text messages to your contacts. There are no file size or bandwidth restrictions.

Integrated contact list

Your Google Talk contact list automatically displays your most-used Gmail contacts, so it's even easier to connect with others.

What's in Google Apps?

Google Apps offers dozens of communication and collaboration tools for any size business. Highlights include:

Gmail

25GB of storage per user

Browser-based user interface

Secure, centralized management

Google Docs

Greater team collaboration

Improved workflow processes due to simplified, centralized management

Google Calendar

Web-based calendar integrated into Gmail

Share calendars within your company or even publicly

Google Groups

Centralize communication across a group

Share documents, calendars, sites, shared folders and video

Google Talk

Browser-based internal video chat and instant messaging

Google Video

A video channel for your business

Google Sites

Google Sites makes creating and sharing a group website easy

Google Apps Marketplace

Discover how top web-based apps from independent software developers integrate with Google Apps

Integrated into Gmail

Instant messaging is built right into Gmail, so you can see who's online and instant message with them in real time, right within the mail browser window. Chat conversations can be saved and searched, just like email conversations.

Mobile access

If you use a BlackBerry® smartphone, you can download the Google Talk application to your device and use Google Talk when you're away from your computer. Just browse to <http://www.blackberry.com/GoogleTalk> from your BlackBerry® smartphone to download the application.

You can access Google Talk from the iPhone, too.

Bookmark <http://talkgadget.google.com/a/your-domain.com/talkgadget/m> from your iPhone's browser. Be sure to replace "your-domain.com" with your actual domain name.

Built on open standards

Built on the open XMPP protocol for instant messaging, Google Talk connects with other XMPP-based instant messaging networks so you can chat beyond the bounds of your own organization.

Supported operating systems

Windows 2000, Windows XP (Home & Pro), Windows Vista and Windows Server 2003.

Supported languages

US English, UK English, Dutch, French, German, Italian, Japanese, Korean, Brazilian Portuguese, Russian, Spanish, Turkish, Chinese (simplified) and Chinese (traditional).

What if I have more questions?

Agosto has extensive information about Google Apps and our Cloud services on our website at www.agosto.com/cloud

You can also reach us at sales@agosto.com or 612-605-3520.

Who is Agosto?

We're one of the nation's oldest, most progressive and fastest-growing cloud and Google Apps consulting firms. An early member in the Google Apps resource network, we're also singled-out by MSP-mentor 100, a distinguished research report that identifies the world's most progressive managed service providers.

We served on Google's Customer Advisory Board in 2008 and joined its Partner Advisory Board in 2009. As one of only 12 partners to sit on the Board, we're one step ahead of nearly any other Google Apps integration company.
