ACCOUNT MANAGEMENT

Every Agosto customer has a dedicated account manager to help with new initiatives, Google feature releases, and serve as an escalation point to coordinate the right resources for your needs. Your account manager can also host Quarterly Business Reviews with your team to analyze and present recommendations based on your Google usage and walk you through Google's roadmap so you're always in the know.

PROACTIVE ADMINISTRATIVE SUPPORT

Your internal domain admins already have a lot on their plate without having to stay on top of all the latest updates to G Suite too. Our complimentary support for G Suite IT administrators includes troubleshooting for your G Suite tools. If an issue needs to be escalated to Google support, we regularly follow up with them for you, so you can stop refreshing your inbox and get back to what's important.

EDUCATION & TRAINING

Your account manager will send out regular, exclusive email updates on best practices, new features within G Suite, and partner spotlights to help your admins expand their knowledge and efficiency no matter their current G Suite experience level. If you need more customized training, we also offer a full range of in-person and virtual consultative workshops for companies of all sizes to aid with change management, ongoing education, and new user onboarding.

In person or virtual, let's get you up to speed.
