

Pt PRODUCTIVITY TOOLS

CHROME OPERATING SYSTEM

Every time you boot up a Chrome device, it downloads the newest OS updates, so you get free system upgrades automatically. No more costly software or licensing fees. No need to upgrade to new versions. It's one smart, seamless experience for end-users across multiple devices.

Modern technology for the modern worker

“I don’t know of any secure OS. In the past eight years, I’ve had 100% success at penetration testing on all of them. Wait, ChromeOS, ChromeOS is the most secure because of its very limited attack vector—there’s just nothing to exploit.”

KEVIN MICKNICK,
FORMER FBI MOST WANTED HACKER

SECURE

Widely considered to be the most secure operating system, Google Chrome has security built-in at every level to provide end-to-end protection. From malware and phishing protection to sandboxing and network security, Chrome OS can securely support employees across the enterprise.

COST EFFECTIVE

With a cutting edge cloud-based OS, Chrome gets rid of regular expenses like software upgrades, downtime, IT ops, maintenance, and training. The result? A sleek, easy to manage system that improves over time with less IT maintenance.

INTELLIGENT UPDATES

Every time you turn on a Chrome device, it checks for system upgrades. That means your Chrome device gets smarter every time you use it.

AGOSTO'S EXPERIENCE

Agosto is a Google Premier Partner and cloud development company that helps businesses modernize and innovate in the cloud to solve complex problems. Our private and public sector customers rely on Agosto services for cloud infrastructure, IoT rapid prototyping, machine learning, productivity tools, and cloud native app development.
